

JACOB ROSA

Aubrey, TX | 787-454-7240 | JacobRosaDev@gmail.com | JacobRosaDev.com

Full-Stack Software Engineer (Front-End Focus) with 3+ years of experience building and deploying scalable, responsive, enterprise-grade web applications.

PROFESSIONAL EXPERIENCE

August 2022 – Present

Comerica Bank | Software Engineer III

- Build and maintain responsive web apps using React/TypeScript and enterprise library components for an award-winning application (Best Digital Account Opening Solution – North America).
- Build and update enterprise component library with Storybook and MUI, enhancing usability, accessibility, and consistency.
- Design and implement MobX state management architecture, improving maintainability and reducing UI defects.
- Integrate REST APIs via Axios, enabling real-time financial data updates across multiple dashboards.
- Build modular SCSS architecture, ensuring responsive design, theme consistency, and maintainable styles.
- Test applications across local, development, QA, and production environments using Jenkins CI/CD pipelines.
- Collaborate with backend engineers, product managers, QA, and UX designers in an Agile/Scrum environment.

EDUCATION

Ana G. Mendez University | 2020

Bachelor's in Information Systems

Ana G. Mendez University | 2015

Technical Studies Degree in Computer Programming

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript ES6, SCSS, Material UI, Storybook, MobX, i18next

Testing: Jest, React Testing Library

Backend: Node.js, REST APIs, Axios

DevOps / Security: Jenkins, Snyk

Tools: Git, NX, CI/CD Pipelines
